Professional Summary

Hi, my name is Jack, I'm personally a very friendly person and love to work with other people. I'm competent in tasks and am great at problem solving, working in a team, staying calm in stressful situations, and helping people in need. My dream job is to be either a lead developer or something to do with aircraft like an aeronautical engineer. I am quite a reliable person to trust, for example: I take part in musical ensembles, and a jazz band representing my school. Rarely ever miss a rehearsal. I am a fast learner who is willing to give anything a go, I'm quick on my feet and can take complex instructions well.
